Feather-Light Ceiling Tiles

Ceilume's Feather-Light Series tiles and panels are the perfect budget-friendly choice for any drop ceiling project. They are made from ultra-thin 0.013 in. thick vinyl and offer the lowest cost per square foot. Designed for use in standard 1 in. T-bar grid systems, they are easy to install, easy to maintain, and offer the look of plaster or tin but with the flexibility, durability, and versatility of vinyl.

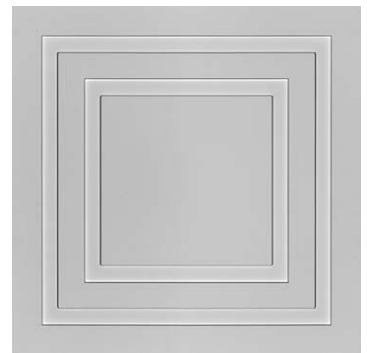

- 2 ft. x 2 ft. tiles or 2 ft. x 4 ft. panels
- Six designer colors, three Transluminous® materials, three metallic finishes, and three faux woodgrains
- Class A fire rated; all styles approved for use beneath fire suppression sprinklers
- GREENGUARD Gold Certified for indoor air quality; non-porous, waterproof, and dust-free
- Made in the USA

Signature Ceiling or Wall Tiles

Ceilume's Signature Series tiles and panels are made from robust 0.030 in. thick vinyl, are more durable than mineral fiber, and easier to install and maintain than metal. These flexible tiles can be mounted to a ceiling surface using adhesive, installed below existing mineral fiber tiles to reface an existing ceiling, or used as drop ceiling tiles in both standard 1 in. and slimline 9/16 in. T-bar grid systems.

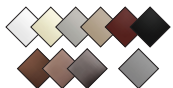

- 2 ft. x 2 ft. tiles or 2 ft. x 4 ft. panels
- Six designer colors, three metallic finishes, three faux woodgrains, and one 100% recycled material
- Class A fire rated; many styles approved for use beneath fire suppression sprinklers
- GREENGUARD Gold Certified for indoor air quality; non-porous, waterproof, and dust-free
- Made in the USA

Designer Colors

All tiles are available in White, Sand, Stone, Latte, Merlot, and Black. These colors have a satin finish, and are stain-resistant, 100% recyclable, and very durable.

Transluminous® Materials

All Feather-Light ceiling tiles are available in Translucent, Frosted, and Clear. Create a fully illuminated ceiling, highlight areas using direct lighting, or allow an unobstructed view of above-grid areas.

Products: Regency and Roman Circle

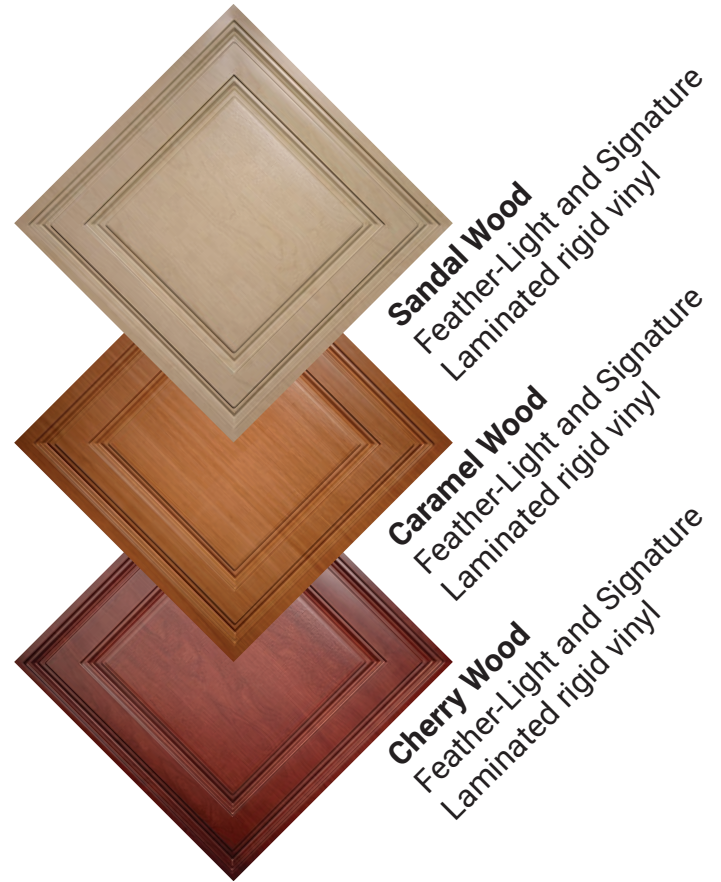

Metallic Finishes

Many Feather-Light and Signature tiles and panels are available in Bronze, Copper, and Tin. These three faux metal finishes create the look of a historic tin ceiling but at a fraction of the price of pressed-metal tiles.

Faux Woodgrains

A select number of Feather-Light and Signature tiles are available in Sandal Wood, Caramel Wood, and Cherry Wood. These faux wood tiles are 100% waterproof, dent resistant, and easier to install and maintain than actual wood.

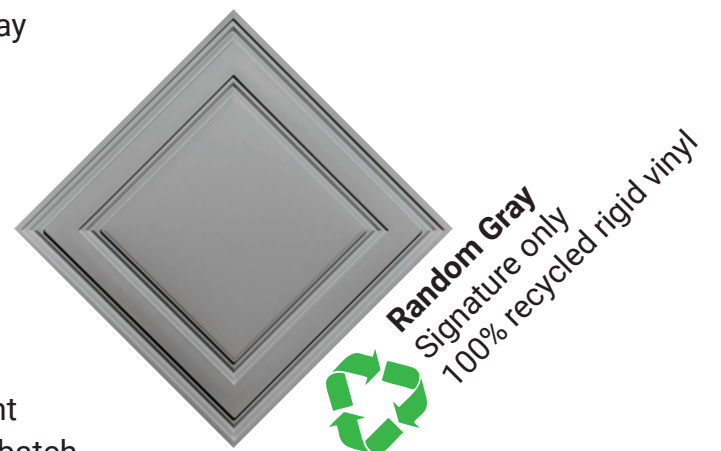

100% Recycled Material

All Signature tiles and panels are available in Random Gray which has all of the features of our other colors - at a reduced cost!

It also presents a unique design opportunity - because this material is made from 100% post-manufacturing scrap, the color is truly random, as it is determined by the material that is recycled.

The color is always a shade of gray and tends to be a light "charcoal," but can shift from dark to light, from batch to batch, and even within a single order, ensuring a ceiling unlike any other.

Products: Madison and Oxford

Soniguard™ Drop Ceiling Insulation

Soniguard™ Drop Ceiling Insulation is thermal-bonded, non-woven batting made from polyester fiber that is dust, fiberglass, and itch free. Pre-cut to 2 ft. x 2 ft. for easy installation, it will dramatically increase both the acoustical properties of your Ceilume ceiling, and the thermal properties of any drop ceiling (vinyl, mineral fiber, and even metal).

- 2 ft. x 2 ft. x 1.5 in. (nominal); use two pieces above 2 ft. x 4 ft. ceiling panels
- Thermal insulating and sound dampening
- Class A fire rated
- GREENGUARD Gold Certified for indoor air quality; dust, itch, and fiberglass free
- Made in the USA

Stratford NRC.85+

Pair Soniguard™ with a perforated Stratford ceiling tile and what do you get? An NRC rating of 85%, an R-value of 6.0, and Ceilume's good looks - that's what!

No other acoustical ceiling panels come close to the price, performance, value, and esthetic combination that the Stratford NRC.85+ Acoustical Ceiling Tile System delivers.

- NRC 0.85
- R-6.0
- Available in 12 colors/finishes

EZ-On Drop Ceiling Grid Covers

EZ-On Drop Ceiling Grid Covers are exactly what their name implies - the easiest way to make old grid look like new. No cleaning, no adhesive, and no special tools are required!

Just two components are needed - Wall Angle Covers and Main Covers. Wall Angle Covers install everywhere the ceiling grid runs along the wall, and Main Covers snap on the main beams and Cross T's.

White and Onyx grid covers color match Ceilume's White and Black tiles perfectly. Mist, Oat, Jasper, and Garnet covers are color coordinating - complementing Ceilume's tiles rather than matching exactly.

- Made from 100% recyclable rigid vinyl; White covers are made from 25% recycled material
- Two matching colors - White and Onyx
- Four coordinating colors - Mist, Oat, Jasper, and Garnet
- Pre-cut to fit 2 ft. x 2 ft. ceiling grid sections; use multiple pieces for 2 ft. x 4 ft. sections
- Made in the USA
