GRATON, CA, 2022-02-10 – Thermoformed panels and tiles from Ceilume are the decorative way to accent ceilings in damp or humid spaces such as bathrooms, toilet rooms, or shower and locker areas. The acoustical panels are made from thermoplastic material that is impervious to moisture so they will not sag, discolor, or support mold when they get wet. The ceilings are durable yet lightweight and easy to install in suspended ceiling grids or adhered directly to the substrate. They are offered in 16 color and finish options and in 49 patterns to satisfy every architectural style.

-----

*About Ceilume:* Ceilume is the leading manufacturer of thermoformed ceiling and wall tiles and panels. The company's roots go back to when "Mid-Century was Modern" and the pioneers of modular ceilings. The family-owned business is located in California's wine country and occupies a historic apple-packing warehouse. With an eye on the future, Ceilume's research and development continues to improve interior finish systems to meet changing environmental, performance, and aesthetic needs. For more information, see [www.ceilume.com/pro](http://www.ceilume.com/pro).
