New Life for Old Ceiling Grids: EZ-On Grid Covers

[Three versions: 260, 150, and 70 words]

[260 Words Version]

EZ-On™ Grid Covers are the new, easy-to-install solution for suspended ceiling T-bar grids that have become stained, damaged or yellowed with age. Made by the manufacturer of Ceilume ceiling panels, EZ-On Grid Covers are snap-on vinyl strips that cover existing T-bar grids with a brilliant white surface, rejuvenating the appearance of the ceiling system. They make old grids look better-than-new, and present a surface that is durable and easy to maintain.

Metal T-bar ceiling grids are durable, but their painted finish is not. The enamel paint discolors over time. It may get damaged during maintenance, and can even rust. A grid that is still completely functional may look terrible.

EZ-On Grid Covers can update a tired ceiling at a fraction of the time and cost it would take to paint or replace the grids. The system has only two components – one to cover grid members, the other for perimeter angles – and installs rapidly on virtually all grids with 15/16 in. (1 in. nominal) flanges.

The vinyl strips slide over the T-bar and snap into place easily. No pre-cleaning is needed, no adhesives are applied, and no tools or special training are needed. They can be installed without removing ceiling panels A 400-square foot room could be done by one person in about an hour.

Made from 100% recyclable rigid vinyl in a cool-white, semi-gloss surface, EZ-On grid covers require no maintenance, and are easy to clean with soap and water. Impervious to moisture, they resist mold growth and are non-yellowing.

EZ-On are available direct from the manufacturer at www.ceilume.com/ez-on-ceiling-grid-covers.

[150 Words Version]

Covers for T-Bars (top) have out tabs for smooth junctions at grid intersections. A second profile (bottom) trims wall perimeter angles.

Cover snaps-over grid and has 1/16th-inch upturns to conceal grid’s visible edges.

EZ-On Grid Covers can be used with Ceilume’s thermoformed ceiling panels to transform the appearance of a room.
